

Provider Notice

To: **All Network Providers and Prescribers**
From: **PerformCare**
Date: **September 20, 2023**
Subject: **MH 23 109 Specialized In-Home Treatment (SPIN) Transition to Family-Based Mental Health Services (FBMHS)**

This Notice serves to inform all Behavioral Health Prescribers that, effective 10/2/2023, Diakon will transition its Specialized In-Home Treatment (SPIN) program from an IBHS service to FBMHS. Problem sexual behavior-focused treatment traditionally offered via SPIN will continue to be offered as a component of the Diakon FBMHS Program.

In addition, Diakon is expanding its provision of FBMHS to all five Capital counties now including Cumberland, Dauphin, Lancaster Lebanon, and Perry. All new requests for the program previously offered as SPIN will need to be prescribed as FBMHS and include clinical information regarding problem sexual behaviors to support medical necessity for Problem Sexual Behavior (PSB) to distinguish the request from traditional FBMHS. Of note, all applicable FBMHS and IBHS forms have been updated to reflect this change as well. Please reach out to your Account Executive with any questions.
